

Project Update: Dillard A/B
September 22, 2023

NOTICE OF CONSTRUCTION

The City of New Orleans Department of Public Works contractor, Barriere Construction Company, LLC, in conjunction with Sewerage and Water Board of New Orleans and The Levee Board will begin installing water, sewer, and drainage lines in your area. The Levee Board will be installing Well Point Systems within all driveways rear to the canal before the beginning of the utility work as a part of a Dewatering Plan.

BEGIN DATE: Wednesday September 27, 2023
END DATE: Friday February 23, 2024

In general, crews will work between 7 a.m. – 5 p.m. Monday through Friday.

WHERE: 500 Warrington Dr.
4800 Warrington Dr.

What residents need to do differently?

Construction on the Well Point System must be installed first. Crews will begin by removing driveways in these blocks. Each driveway will be back filled and ramped with temporary aggregate to maintain access until the utilities are finalized. While utilities in your area are being worked on driveway access will be lost periodically until restoration is done. As this work is being completed, sections of your street may be inaccessible. Signage will be posted. **We ask that residents please adhere to no parking signage on the streets. Vehicles parked in these zones will be ticketed and towed.** Additional notice will be given to residents prior to work impacting driveway access.

U.S. Postal Service and sanitation/recycling services will continue throughout construction; however, depending on conditions in front of your residence you may be asked to take your garbage and recycling bins to the nearest accessible corner on your normal collection days.

About the Project

This temporary disruption of services is part of the \$39.5M Dillard A/B joint infrastructure project with the City of New Orleans' Department of Public Works and Sewerage and Water Board of New Orleans.

Once complete, residents will experience an overall improved quality of life as the project will improve subsurface utilities along with roadway restoration. The project is scheduled to be completed in Fall 2024.
