

## Community Update – August 2023

### Marlyville-Fontainebleau Group A

**Marlyville-Fontainebleau Group A** is a project in the Marlyville and Fontainebleau neighborhoods. The project spans across approximately 140 blocks with 24 blocks being full reconstruction of the roadway and subsurface utilities.

Temporary inconveniences do tend to accompany infrastructure upgrades; however, in this case, the delays and access issues have been excessive. In recent months, leaders from the City Infrastructure Team have been conducting site visits and working closely with the combined Sewerage and Water Board New Orleans (SWBNO) / Department of Public Works (DPW) project management and construction contractor team. We are committed to holding all members of the team accountable to finding solutions for the issues holding up construction, as well as to getting this work completed with an improved quality of life for the community. Following is an update and path forward on completing this project with minimal delays by the anticipated **fall 2024** end date.

#### Project Outlook

Due to delays on this project crews will continue to work some weekends to meet critical deadlines outlined in this update. **Residents will continue to be notified ahead of any weekend work.**

Below is a project update provided by the RR116 Team:

Utilities on 7000 Walmsley will be completed by the end of August. Roadway restoration will follow and will occur for the next 4-6 weeks after utility work. Please continue to bring trash cans to the nearest accessible corner as we complete the roadway.

3000 Pine will be completed by a mill and overlay operation this month. All roadwork near Dominican High School should be completed in the month of August. The intersection of Neron and Burdette will be completed during the month of August, pending work around Dominican High School completion.

This **\$26.8M** Marlyville-Fontainebleau Group A project was designed by Schrenk, Endom & Flanagan and is being constructed by Hard Rock Construction. The scope of work varies block by block but includes the following:

- Repaving the asphalt roadway from curb-to-curb
- Replacing damaged portions of concrete with new concrete
- Patching the roadway with asphalt, repairing damaged sidewalks and driveway aprons
- Installing ADA compliant curb ramps at intersections
- Replacing/repairing damaged underground water, sewer and/or drainage lines

#### How to Stay Informed

Questions about this project may be directed to [roadwork@nola.gov](mailto:roadwork@nola.gov) or to our RoadworkNOLA hotline 504.658.ROAD (7623) or **sign up for RoadworkNOLA text alerts by texting ROADWORK to 77295, or go to [ready.nola.gov/alerts](https://ready.nola.gov/alerts) to create a whole profile and select the “roadwork” alert.**
