

# ROADWORK

CITY OF NEW ORLEANS  
ROADWORK.NOLA.GOV

April 27, 2018

The Department of Public Works' construction contractor, Barriere Construction, LLC. will mobilize construction crews to Belleville St. on Monday, May 7, 2018. Crews will be repaving Belleville St. from Socrates St. to Opelousas St. in asphalt. The approximately \$350,000 repaving project will take approximately three months to complete.

Barriere Construction, LLC's scope of work includes:

- Removing and replacing the top layer of asphalt pavement;
- Repairing damaged catch basins and drain lines;
- Installing new Americans with Disabilities Act-compliant curb ramps at appropriate intersections;
- Making minimal sidewalk, driveway apron and foot lap adjustments; and
- Adding roadway striping (Crosswalks)

Throughout the duration of construction, parking may be limited within the construction zone. Please plan to park at other locations and expect traffic delays/additional time to reach your destination.

In general, construction crews will be working from 7 a.m. to 5 p.m. Monday through Friday. Saturday work may occur when inclement weather prevents work from occurring as scheduled during the previous week. Residents are reminded to use caution when driving, bicycling and walking near active construction sites.

For more information about this project contact RoadWorkNOLA at [roadwork@nola.gov](mailto:roadwork@nola.gov) or 504-658-ROAD (7623).

Thank you in advance for your patience.
